40 YEARS OF HERITAGE IN INNOVATION

Fincons Group is an IT business consulting company that has been designing the digital future of leading companies for 40 years, offering cutting-edge solutions and services. With revenues of 225m CHF in 2022, Fincons is a multinational with several offices worldwide and, at the same time, a Family Company where the founders play a strategic role with commitment and passion.

Michele Moretti und Francesco Moretti

Fincons built its reputation on foreseeing and interpreting new business models and the rapid evolution of IT systems, by creating a complete range of services to support clients across different industries along their digital transformation journey. Switzerland is home to the company's HQ, and here, its high skilled professionals have helped build a solid reputation with a portfolio of prestigious clients that have chosen Fincons and its Smart-shore and Swiss-shore business model for security, compliance and cost-effective services.

Nevertheless, a core value for Fincons, that drives its ESG policies, is the need to create a business model that is not just efficient, but also sustainable.
